environmental
quality and
economic vitality,
by regulating
hazardous waste,
conducting and
overseeing
cleanups, and
developing
and promoting
pollution prevention.*

State of California

**California
Environmental
Protection Agency**

Under the oversight of the California Environmental Protection Agency, Regional Water Quality Control Board (RWQCB), and Department of Toxic Substances Control (DTSC), SECOR International will be conducting a 5-day dual phase extraction (DPE) pilot test at the property identified as Parcel 2A located at the southwest corner of West Weber Avenue and Lincoln Street, Stockton, California. Parcel 2A is currently a vacant lot.

The 5-day DPE pilot test is scheduled to begin Monday, March 3, 2003, and end on March 7, 2003. Work will be performed 24 hours day for 5 days and will be conducted using SECOR's mobile treatment system (MTS). The MTS consists of a liquid-ring blower, a 100-gallon liquid/vapor separator, a liquid transfer pump, and a thermal oxidizer to abate petroleum hydrocarbon vapors prior to discharge to the atmosphere. Additional equipment utilized to complete the test are a trailer mounted generator, and a 21,000-gallon capacity water tank. As a standard safety precaution, workers operating equipment and overseeing Site activities may be wearing protective clothing and possible air purification equipment during the test. Working zones will be established using orange cones and fencing. All non-SECOR personnel will be restricted from entering the established work zone.

Specific information regarding this project is available in the *Work Plan for Additional Dual-Phase Extraction Pilot Testing, Parcel 2A and Adjacent Areas, Stockton, California* dated January 22, 2003. This Work Plan is available for public review at the Cesar Chavez Central Library, located at 605 North El Dorado Street in Stockton, California, under the file name "West Weber Avenue and North Lincoln Street – Delta Gateway Apartments". Additionally, the Work Plan is available for public review at the RWQCB Cleanup Annex, 10365 Old Placerville Road, Suite 210, Sacramento, California. If you are interested in reviewing the Plan, please visit the library or contact the RWQCB Project Manager, Devra Lewis, at (916) 255-3119.

Upon completion of the above work, SECOR will submit a technical report to the RWQCB and DTSC documenting the findings of the pilot test.

Questions or concerns should be directed to any of the following project contacts: Devra Lewis, RWQCB Project Manager, at 916-255-3119, Jerry Lile, DTSC Project Manager, at 916-255-3744, or Heidi Nelson, Public Participation Specialist, at 916-255-3575.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website at www.dtsc.ca.gov.
